

Solution Requirements

Date	25 June 2026
Team ID	-
Project Name	Credit Card Approval Prediction System
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	<i>Users securely log in using email and password.</i>	High

2	Authorization levels	<i>Applicant can submit applications; Admin can manage and monitor records.</i>	High
3	External interfaces	<i>Connects to ML prediction model and applicant database.</i>	High
4	Transactions processing	<i>Stores application details and processes eligibility prediction.</i>	High
5	Reporting	<i>Displays prediction result and maintains application history.</i>	Medium
6	Business rules, etc.	<i>Predict approval based on applicant financial details and ML model.</i>	High

7	Compliance to laws or regulations	<i>Protect applicant data and maintain privacy standards.</i>	High
8	<i>Other</i>	<i>Allow users to view prediction results instantly.</i>	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	<i>Generate prediction quickly.</i>	<i>Response time < 3 seconds</i>
2	Scalability	<i>Handle increasing number of users and applications.</i>	<i>Support 1000+ users</i>

3	Security & Data Privacy	<i>Encrypt and securely store applicant data.</i>	<i>Secure login & encrypted storage</i>
4	Reliability & Availability	<i>System should remain available most of the time.</i>	<i>99% uptime</i>
5	Usability & Accessibility	<i>Simple, user-friendly interface.</i>	<i>Easy navigation and responsive UI</i>
6	<i>Other</i>	<i>Easy maintenance and future model updates.</i>	Modular and maintainable system
