

Demonstration of Proposed Features

Date	02 July 2026
Team ID	-
Project Name	Credit Card Approval Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

The **Credit Card Approval Prediction System** was developed to automate the credit card approval process using machine learning. The following table summarizes the proposed features, their implementation status, and whether they were successfully demonstrated during the project presentation.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	User Authentication Interface	Home page for accessing the prediction system.	Implemented	Yes	Working successfully
2	Applicant Data Entry Form	Form to collect applicant details required for prediction	Implemented	Yes	User-friendly interface
3	Credit Card Approval Prediction	Random Forest model predicts approval or rejection.	Implemented	Yes	Accurate prediction generated
4	Result Display	Displays prediction result with confidence score.	Implemented	Yes	Results shown correctly
5	Responsive Web Interface	Responsive frontend using HTML, CSS, and Bootstrap.	Implemented	Yes	Works on different screen sizes
6	Model Integration	Flask backend integrated with trained ML model.	Implemented	Yes	Successfully connected

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6

Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
